Subject: "DRAFT REPOSITORY SEIS, DRAFT NEVADA RAIL CORRIDOR SEIS, and DRAFT RAIL ALIGNMENT  
EIS"

LSN: Relevant - Not Privileged

User Filed as: Exc/AdminMgmt-14-4/QA:N/A

TO: EIS Office, U.S. Department of Energy (USDOE), Office of Civilian Radioactive Waste  
Management, 1551 Hillshire Drive, Las Vegas, Nevada 89134.

FROM: DENNIS R. NELSON, Energy and Environmental Researcher, 19 East Ohio Street,  
#1204, Chicago, Illinois 60611. MY

1 [ COMMENTS ABOUT WHY YUCCA MOUNTAIN (NEVADA) IS NOT A SUITABLE  
LOCATION TO PERPETUALLY STORE DANDEROUS AND TOXIC HIGH-LEVEL  
NUCLEAR WASTES WILL BE BRIEF AND TO-THE-POINT! Transporting canisters of  
high-level radwaste on trucks, trains, and barges through 45 states and the District of Columbia  
would create possible 'Mobile Chernobyls' (severe accidents) and 'dirty bombs-on-wheels'  
(terrorist attacks) for millions of us. The USDOE awarded a contract to design these TAD  
(Transport, Aging, and Disposal) canisters to Holtec International--a company seriously violating  
federal quality assurance (QA) regulations. Because the Western Shoshone Native American  
Nation is firmly against the high-level nuclear waste repository at its sacred Yucca Mountain  
(within its treaty lands), the proposed USDOE project is a "human rights violation/environmental  
racism." Using just "Standard or Reference Man" (a young, healthy adult white male WHICH  
SHOULD BE 'RETIRED'), the USDOE did NOT analyze the adverse health effects of Yucca  
Mountain's radwaste leakage into the groundwater (drinking water) supply on pregnant women,  
fetuses, infants, children, the elderly, and others with compromised immune systems. ]  
RESPECTIVLY SUBMITTED, DENNIS R. NELSON.
